

Once upon a time in a quiet village nestled between the hills, lived a young coder named Krina.

She wasn't like the others. While others dreamt of riches and fame, Krina dreamt of building tools that made people's lives easier.

One rainy evening, she stumbled upon a challenge - could she turn text into voice? After nights of research, she succeeded.

And thus began her journey into the world of ethical hacking, AI, and digital magic.

Her story had just begun...
